

AddisCoder Lecture 1: Introduction

Daniel Kang

Who am I?

- Professor of computer science at UIUC
- Research: machine learning + computer systems
- Taught for AddisCoder in 2016, 2018

The rest of the team

Lecturers:

Alex Krentsel

Heather Huynh

Jelani Nelson

TAs:

Why computer science?

World largest company by market cap

\$0 \$1,000,000 \$2,000,000

1,000,000 more jobs than students by 2020

Computer science
**is a top paying
college degree**
and computer
programming
**jobs are growing
at 2X the
national average.**

What will you learn in this class?

- Basic programming in  python™
- Algorithmic thinking and implementation

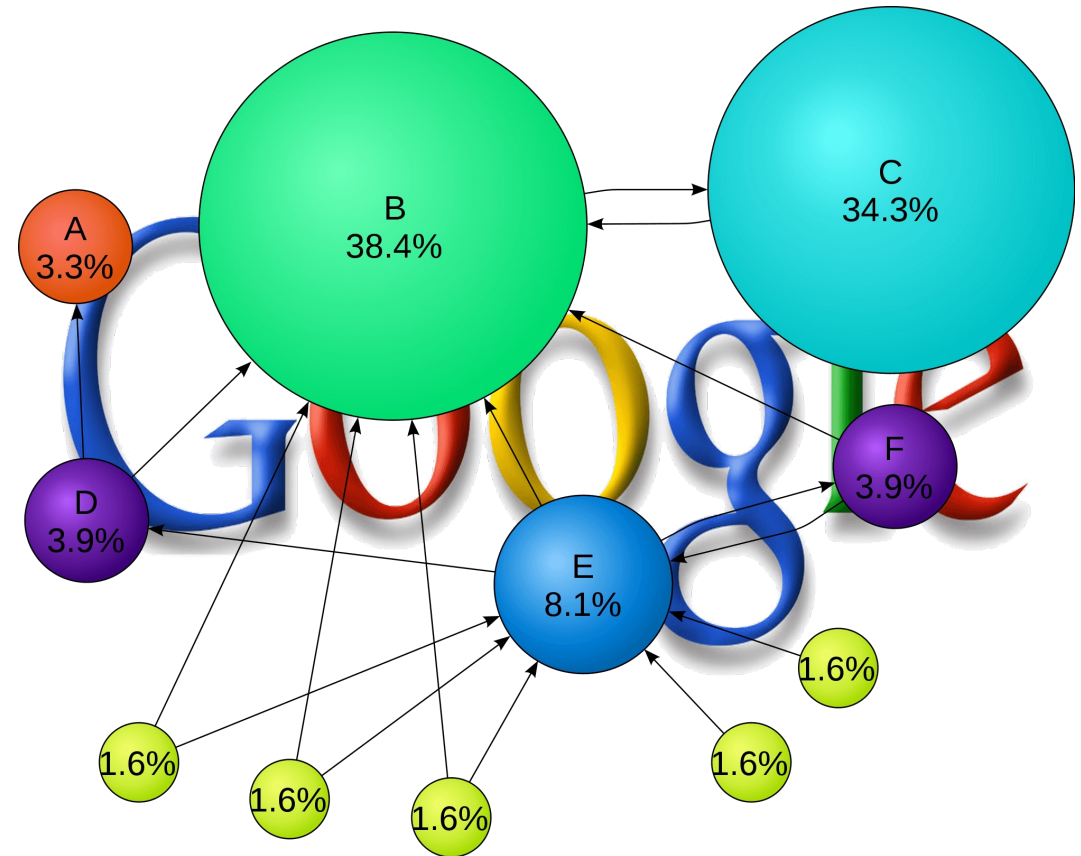

You will NOT learn

- App development
- HCI, ML, ...

Why algorithms?

PageRank: foundation for Google

- Basis for Google search
- Quickly find links that are popular

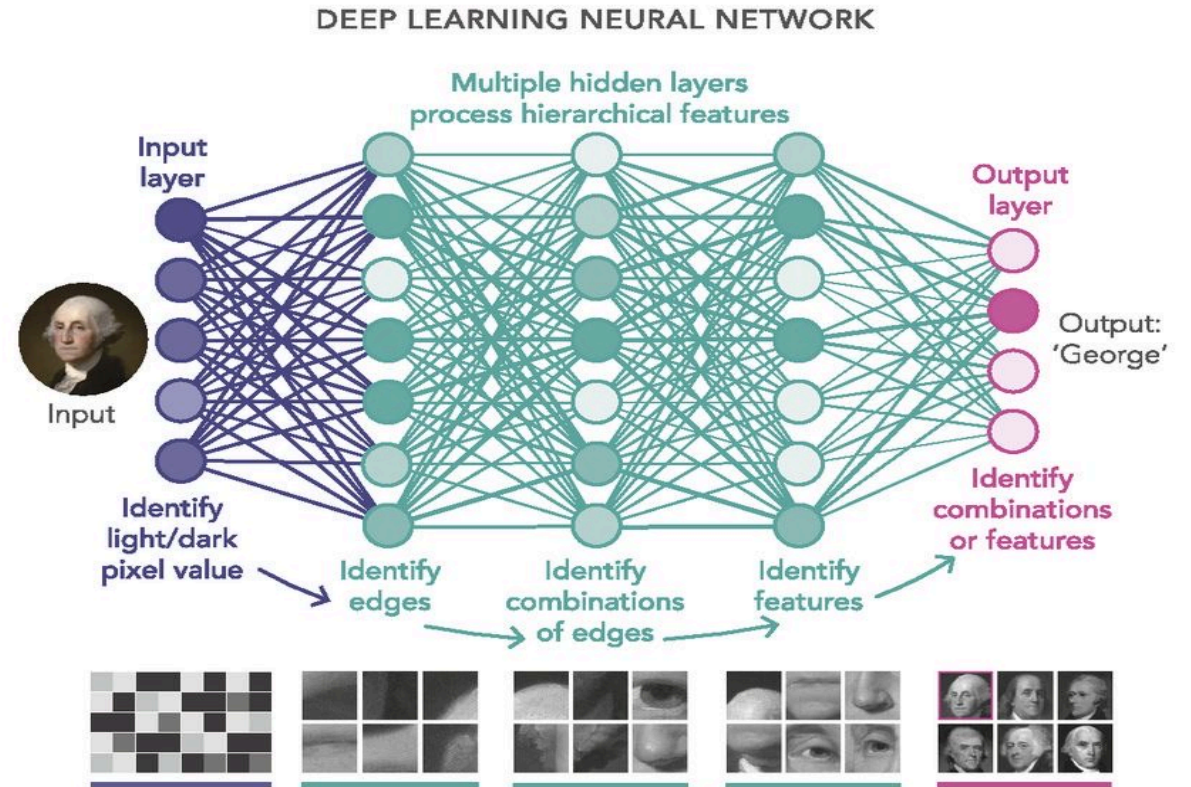

Consistent hashing data structure

Streams 200 million movies simultaneously

Back propagation

Backbone of AI revolution

Let's hear from AddisCoder alumni

Let's start learning

Expectations for this course

- This course moves fast
- You will need to seriously engage with the material
- We are here to help!
